PROFESSIONAL SUMMARY

Recent Software Engineering graduate with hands-on experience developing Android applications using Kotlin, Jetpack Compose, Room, SQLite, and MVVM architecture. Experienced building scalable mobile applications with modern Android development practices, reusable UI components, reactive UI state management, and local persistence layers. Skilled in Git, Android Studio, REST APIs, SQL, and Agile development practices, with additional leadership experience managing high-volume restaurant operations in fast-paced environments. Seeking an entry-level Android or software development role focused on mobile application development and modern software engineering practices.

TECHNICAL SKILLS

Programming Languages: Kotlin, Java, Python, JavaScript, SQL

Mobile Development: Android SDK, Jetpack Compose, Room, SQLite

Web Technologies: HTML, CSS, JavaScript

Tools & Technologies: Git, GitHub, Android Studio, REST APIs

Architecture & Methodologies: MVVM, Object-Oriented Programming, Agile Development, Repository Pattern, StateFlow

Professional Skills: Problem Solving, Team Leadership, Communication, Project Coordination

TECHNICAL PROJECTS

Restaurant POS System | Kotlin, Jetpack Compose, Room, SQLite

GitHub: <https://github.com/ChaseMorgan333/RestaurantPOS>

- Designed and developed a multi-screen Android restaurant POS application using Kotlin and Jetpack Compose
- Implemented MVVM architecture with repository pattern and reactive UI state management using StateFlow and Room persistence
- Built reusable UI components for dining room management, order entry, payment workflows, and employee authentication
- Developed business-rule-driven check lifecycle workflows supporting draft, open, and closed order states
- Designed local persistence layer using Room DAOs and repository abstractions for scalable data management
- Structured application components for future backend API and kitchen display system integration

- Currently expanding the application with offline-first architecture concepts and scalable restaurant workflow features

Vacation Planner Mobile Application | Java, Android, SQLite, Room

GitHub: <https://github.com/ChaseMorgan333/VacationPlanner2.0>

- Developed a mobile application for creating, organizing, and tracking vacation plans and excursions
- Implemented local data persistence using SQLite and Room database architecture
- Applied MVVM design principles and object-oriented programming practices
- Produced technical documentation including wireframes, ER diagrams, class diagrams, and user guides

Spring Boot REST API Project (Planned Development) | Java, Spring Boot, REST APIs, SQL

GitHub: <https://github.com/ChaseMorgan333/POSbackend>

- Currently building backend development skills using Java, Spring Boot, REST APIs, and SQL database concepts
- Learning API architecture, request handling, layered backend structure, and database integration
- Planned as a future backend foundation for restaurant POS functionality and mobile application integration

What I Am Learning

- Designing RESTful endpoints for application data
- Separating controller, service, repository, and model layers
- Connecting backend systems to mobile and client applications

Personal Portfolio Website | HTML, CSS, JavaScript

GitHub: <https://github.com/chasemorgan333>

- Designed and developed a responsive portfolio website to showcase software development projects and technical skills
- Implemented responsive layouts and interactive JavaScript-based UI components
- Published project portfolio using GitHub Pages

EDUCATION

Bachelor of Science, Software Engineering

Western Governors University — Graduated February 2026

Associate of Applied Science, Software Development

Houston Community College — May 2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- CompTIA Project+

PROFESSIONAL EXPERIENCE

Manager On Duty — ACG Texas IHOP

January 2020 – Present

- Manage daily restaurant operations including staffing, scheduling, inventory control, budgeting, and customer service
- Train and supervise employees to maintain operational efficiency and service quality in a high-volume environment
- Monitor labor and food cost metrics to support profitability and operational goals
- Implement workflow improvements that increased team productivity and operational consistency
- Maintain compliance with corporate standards, safety procedures, and health department regulations

Assistant Recruiter — MIT Professionals, Inc.

June 2016 – March 2018

- Sourced candidates for professional and technical positions using multiple recruiting channels
- Maintained candidate tracking systems and hiring pipeline documentation
- Collaborated with senior recruiters to support hiring initiatives and candidate communication
