PROFESSIONAL SUMMARY

Recent software engineering graduate with hands-on experience designing, developing, and debugging full-stack and mobile applications using Java, Kotlin, Spring Boot, React, SQL, and REST APIs. Built database-backed systems with layered architectures, local persistence, client-server communication, and business-rule-driven workflows. Strong foundation in OOP, Agile development, API integration, Git, testing fundamentals, and cross-layer troubleshooting.

TECHNICAL SKILLS

Languages: Java, Kotlin, JavaScript, Python, SQL

Backend and APIs: Spring Boot, REST APIs, JSON, MySQL, Web Services, API Integration

Mobile: Android SDK, Jetpack Compose, Room, SQLite, MVVM, StateFlow, ViewModels

Web: React, HTML5, CSS3

Tools: Git, GitHub, Android Studio, IntelliJ IDEA, MySQL Workbench, Postman, Gradle

Practices: Object-Oriented Programming, Repository Pattern, Agile Methodologies, Software Development Lifecycle, API Testing, Unit Testing Fundamentals, Debugging, Troubleshooting, Technical Documentation

TECHNICAL PROJECTS

Restaurant POS Software Platform | Kotlin, Java, Jetpack Compose, Spring Boot, MySQL, Room, React

github.com/ChaseMorgan333/RestaurantPOS

- Designed and developed a full-stack restaurant point-of-sale platform consisting of an Android tablet application, Java Spring Boot backend, React management portal, and MySQL database.
- Built the Android client using Kotlin, Jetpack Compose, MVVM, ViewModels, repository pattern, Room, SQLite, and reactive state management.
- Developed RESTful APIs and backend functionality using Java, Spring Boot, JSON, MySQL, and layered controller-service-repository architecture.
- Implemented client-server synchronization using Retrofit, REST endpoints, DTOs, timestamps, and JSON request and response payloads.
- Designed state-driven business logic for draft, open, and closed checks, enforcing payment eligibility, order submission, item removal, void actions, and manager-controlled workflows.
- Tested and troubleshooted API requests, JSON responses, HTTP status codes, database updates, backend health checks, CORS configuration, and network connectivity.

Vacation Planner Mobile Application | Java, Android, Room, SQLite

github.com/ChaseMorgan333/VacationPlanner2.0

- Developed an Android application for creating, organizing, and tracking vacations, excursions, notes, alerts, and related travel information.
- Implemented Room and SQLite persistence and produced wireframes, ER diagrams, class diagrams, testing documentation, and user guides.

Personal Portfolio Website | HTML5, CSS3, JavaScript, GitHub Pages

- Designed and published a responsive portfolio website showcasing software projects, technical skills, source-code repositories, and professional materials.

EDUCATION

Bachelor of Science, Software Engineering | Western Governors University

Graduated February 2026

Associate of Applied Science, Software Development | Houston Community College

May 2022

CERTIFICATIONS

AWS Certified Cloud Practitioner | CompTIA Project+

PROFESSIONAL EXPERIENCE

Manager on Duty | ACG Texas IHOP

January 2020 - Present

- Coordinate staffing, scheduling, inventory, budgeting, customer service, and operational workflows in a high-volume environment.
- Troubleshoot time-sensitive operational issues, determine appropriate solutions, and maintain service continuity with minimal supervision.
- Train and supervise employees, communicate procedures clearly, and collaborate across teams to maintain service quality, safety standards, and regulatory compliance.

Assistant Recruiter | MIT Professionals, Inc.

June 2016 - March 2018

- Sourced candidates for professional and technical positions while maintaining candidate tracking systems and hiring-pipeline documentation.
- Coordinated communication between candidates, recruiters, and client organizations throughout the recruitment process.
